

Successful Single Parenting

People become single parents through a range of life choices and circumstances. Parenting alone is different in many ways compared to a two parent household and can have its difficulties and challenges.

Whatever the challenges it is important to live your life in ways that shows your children you are happy. This will help them accept and value their lifestyle.

If you are a single parent and are through that initial break-up stage this course will provide strategies that will help you develop a close and special relationship with your child.

This seminar will look at:

- the challenges and benefits of being a single parent
- developing an understanding of what children need when in a single parent family
- the emotional and practical needs of the single parent
- strategies to manage new relationships
